1. INTRODUCTION

The National Rural Health Mission (NRHM) was launched in 2005 to provide equitable, affordable, and quality health care to the rural population. Further, in 2017, the National Urban Health Mission (NUHM) was launched to meet the healthcare needs of the urban population with a focus on the urban poor. NUHM and NRHM constitute the National Health Mission (NHM), the country's flagship health system strengthening programme. In its earlier phases, National Health Mission was targeted to strengthen Reproductive and Child Health (RCH) services and contain the increasing burden of communicable diseases such as Tuberculosis, HIV/ AIDS and vector-borne diseases. However, focusing on selective primary health care intervention improved the key indicators related to RCH and select communicable diseases, but the range of services delivered at the primary care level did not consider the increasing disease burden and rising care costs due to chronic diseases. In addition, there is a background of an inverted health pyramid, where tertiary care facilities handle a significant amount of primary healthcare demands since primary care facilities struggle with capacity and quality.

The Ayushman Bharat (AB) programme launched by the Ministry of Health and Family Welfare attempts to move from a selective approach to health care to deliver a comprehensive range of preventive, promotive, curative, rehabilitative and palliative care services. It has two components which are complementary to each other. Under its first component, Health & Wellness Centres (HWCs) have been created to deliver Comprehensive Primary Health Care (CPHC) that is universal and free to users, focusing on wellness and delivering an expanded range of services closer to the community. The second component of Ayushman Bharat, namely the Pradhan Mantri Jan Arogya Yojana (PMJAY), aims to provide financial protection for secondary and tertiary care to the bottom 40% of India's population. Its success and affordability rest substantially on the effectiveness of delivering CPHC through HWCs. Together, the two components of Ayushman Bharat will enable the realisation of the aspiration for Universal Health Coverage. A complete continuation of care under Ayushman Bharat is shown in annexure-1, Figure 2.

The Ayushman Bharat- Health & Wellness Centres (AB-HWCs) programme is a set of multiple reforms, spanning all aspects of the healthcare systems such as service delivery, human resources, financing, access to essential medicines and diagnostics, community participation and ownership and governance. The Government of India had announced that 1,50,000 HWCs would be created across India by the end of December 2022. It was envisaged that the most upgraded Health Centers would be existing Sub-Health Centres (SHCs) (119,628 of 157,411 SHCs) in the country. These HWCs will offer a range of CPHC services to catchment communities (Refer to Annexure II). The focus on upgrading SHCs, which have been established at a norm of one per 3,000-5,000 populations, will potentially bring an expanded range of primary healthcare services closer to communities. As of July 2023, 1,60,864 HWCs have been established in the country, and this realises the vision as envisaged in National Health Policy 2017, which calls for providing comprehensive healthcare that is universal, free, and closer to the community.

1.1. KEY ELEMENTS/FEATURES OF THE PROGRAMME

To effectively provide a CPHC package including geriatric, palliative care and rehabilitative care services through upgraded facilities called "Health and Wellness Centers", the programme envisages a certain set of key elements of the CPHC as given in Annexure-I, figure-3. The details are as follows:

- a. **Expanded Service delivery:** AB-HWCs enable the expansion of the package of services that go beyond maternal and child health to include care for non -communicable diseases, palliative and rehabilitative care, Oral, Eye and ENT care, mental health and first-level care for emergencies and trauma.
- b. **Continuum of Care- Tele-health and referral:** The delivery of CPHC through AB-HWCs envisages a gatekeeping function and a two-way referral system- that links to secondary and tertiary care and follow-up care. At all levels, teleconsultation is being done to improve referral advice, seek clarifications, and undertake virtual training, including case management support by specialists.
- c. **Expanding HR –** A new cadre of worker Community Health Officers (CHOs) trained in competencies of primary health care has been posted at SHC-HWC. The Community Health Officer is expected to improve clinical management, continuum of care, dispensation of drugs and close follow-up for those with chronic illness/patients discharged from health facilities. CHO leads the team of Multipurpose Workers and ASHAs. All the service providers at AB-HWCs are being trained appropriately to deliver the expanded package of services to the community.
- d. **Medicines and Expanding Diagnostics: –** Adequate availability of essential medicines and diagnostics enable medicine dispensation and necessary tests close to the community. A total of 105 free and essential medicines at HWC-SHC and 172 medicines at HWC-PHC, and 14 diagnostic tests at HWC-SHC and 63 at HWC-PHCs are available for the community.
- e. **Community Mobilization and Health Promotion –** Health promotion at AB-HWCs is facilitated through the engagement of community-level collectives such as – Village Health Sanitation & Nutrition Committee (VHSNCs), Mahila Arogya Samiti (MAS) and Sel-help Groups (SHGs). Community mobilisation for action on social and environmental determinants builds on the accountability initiatives under NHM, and it ensures that there is no denial of health care and universality and equity are respected.
- f. **Robust IT System-** HWC team are equipped with IT equipment- Tablets at SCs and Laptop/ Desktop at PHC level to create electronic health record of the population covered by HWCs. Developing a robust IT system will support the AB-HWC team to track the patients for treatment adherence and follow-up.
- g. **Infrastructure –** AB-HWCs are being upgraded and branded to provide sufficient space for expanded service delivery, medicine dispensation, diagnostics organised, space for wellness-related activities, including the practice of yoga etc., adequate spaces to display communication such as the material of health messages, including audio-visual aids.
- h. **Partnerships for knowledge and implementation-** Partnerships with development partners and technical support agencies are being done to integrate AB-HWC in their domain. These partnerships provide implementation support to the states, research and advocacy of the AB-HWC Program.
- i. **Financing- provider payment reforms-** Performance-linked payments to the performance of the AB-HWC team have been introduced to foster team spirit. It is a mechanism to promote the demand for health care in the community and deliver optimum and timely care close to the community.

The essential outputs, outcomes and impacts expected out of the schemes are as follows:

- **Outputs**
 - ✓ Population enumeration and empanelment of all families and individuals in an area served by an HWC.
 - ✓ Health Cards and Family Health Folders for all service users to ensure access to all health care entitlements and enable a continuum of care.
 - ✓ HWCs to provide access to an expanded range of services as mentioned in Annexure-I, figure-1.
 - ✓ Timely delivery of services
- **Outcomes**
 - ✓ Reduction in Out-of-Pocket Expenditure and Catastrophic Health Expenditure
 - ✓ Risk mitigation factor
 - ✓ Decongestion of secondary and tertiary healthcare facilities
 - ✓ Improved coverage of HWC services

 - ✓ Improvement in Health outcomes in terms of Infant Mortality Rates, Maternal Mortality Rates, percentage of Anemic Population etc.

2. **OBJECTIVE OF THIS EVALUATION STUDY**

The primary aim of this evaluation study is to measure the programme's performance against the inputs and outputs and assess the processes involved in the effective service delivery by the HWCs. The study will also assess whether the program is the right intervention/policy instrument for ensuring CPHC to the citizens. The data on outcomes collected in this evaluation study through the field survey would act as a midline survey for future impact assessment of the HWCs.

The objectives of this evaluation study are given below:

- **Planning Process**
 - ✓ To assess the availability of state-level plans for conversion, implementation, and monitoring & evaluation of HWCs.
 - ✓ To determine state-level barriers and facilitators in identifying, allocating and utilizing funds for HWCs.
- **Inputs**
 - ✓ To assess the availability of requisite infrastructure, manpower (quality & quantity), logistics, teleconsultation/telemedicine facilities as per the CPHC and IPHS-2022 guidelines and challenges faced therein.
 - ✓ To assess the availability of requisite digital systems for registration, service delivery, logistics etc.
- **Outputs**
 - ✓ To assess the status of implementation of enumeration and empanelment of HWC beneficiaries
 - ✓ To assess the availability and quality of the expanded range of services at the HWCs
 - ✓ To ascertain the availability of two-way referral systems at the HWCs

- **Impact/Outcomes**

- ✓ To collect data on various outcome indicators at the household level pertaining to healthcare services provided at the HWCs. This will serve as a midline survey of the scheme impact assessment.
- ✓ To make a comparative analysis of the outcome indicators in the HWC covered vis-à-vis non-HWC regions.

3. **SCOPE OF SERVICES**

3.2. Mechanisms to ensure data quality

A multi-pronged robust process for quality control needs to be followed during data collection. The following aspects need to consider:

- i. The field investigators to be engaged in conducting the Key Informant Interviews(KII) and Focused Group Discussions (FGD) should have at least three years of experience in conducting similar surveys/interviews. A 2-step training (classroom and then on-the-field training) should be conducted for all field investigators.
- ii. It is recommended that pilots should be conducted on at least 2% of the sample size for both KIIs as well as FGDs to finetune the inquiry tools. A brief on the

- learnings from such a pilot exercise and subsequent improvements in the tools/questionnaires should also be shared with the Authority.
- iii. 100% of the data collected should be validated using a validation checklist. Missing data points should be recollected.
 - iv. 10% of the total households surveyed need to be back-checked. Spot checks of household interviews also need to be carried out.
 - v. In the case of FGDs, at least 20% of data should also be telephonically verified about the conduct of the FGD. Random checks from a few participants from a few FGDs may also be done.
 - vi. Use of mobile-based, near real-time and geo-tagged data collection and validation tools should be made to ensure efficiency and accuracy in data collection. Access to tools and data should be provided to the Authority.
 - vii. In case of any compromise in quality, a suitable penalty would be imposed on the Consultant as per the provisions given in the RFP.

4. **DATA COLLECTION AND METHODOLOGY**

4.1. **Data Collection**

Tentative methods and sources to be utilized to collect data are described in the table below.

Table 1: Data Sources for the AB-HWC assessment

Quantitative data		Qualitative data	
Primary data	Secondary data	Primary data	Secondary data
- Household Survey - Facility assessments	Integrated Health Information Platform (IHIP), Health Management Information System (HMIS), Non-communicable Diseases Data Portal (NCD portal) and AB-HWC, etc.	- Key Informant Interviews (KIIs) - Facility observation including field notes. - FGDs	- Relevant state/central, etc. documents - Facility records

Note: Apart from the above-given sources, additional sources can be considered by the Consultant after approval of the Authority

4.1.1. Quantitative Data Collection

- **Facility Assessment** will be the primary tool for measuring the achievement of HWCs against inputs and outputs. A checklist for HWCs using selected parameters from the IPHS-based proforma for facility survey of SHCs and PHCs as well as some additional/changed parameters as per HWC requirement, shall be used.
- **Household surveys** may be used for obtaining information on awareness of services provided at HWCs, choice of provider, experience, satisfaction, etc with the services.
- **Secondary Data:** Data from the reporting facilities may be fetched from AB-HWC portal through NHSRC and may be compared with pre-conversion data from HMIS.

4.1.2. Qualitative Data Collection

Qualitative data collection may be taken primarily from the perspective of the study objectives. Key informant interviews with State, district, and block-level health officials; and FGDs with various community health workers, Beneficiaries/Community, shall be conducted.

4.2. **Methodology**

A cross-sectional study design with a mixed-methods approach of both quantitative and qualitative methods shall be used. Secondary and primary survey data shall be used to compare the performance of HWCs (SHCs, PHCs, and UPHCs) with non-HWC, wherever possible, between pre and post-conversion periods. The study will include only those HWCs which have passed at least one year, i.e., the facilities which were operationalized as on 30 June 2022. This will help ensure HWCs are evaluated and have reached a certain maturity in terms of development.

4.2.1. Stepwise Calculation for sample size of facilities

Stage 1: A total of 15 states shall be covered across the six zones. The states are chosen in such a manner that they cumulatively account for at least 70% of the HWCs. The percentage of HWCs out of the total HWCs in India (as of June 2022) was calculated for each State. The states were ranked based on this parameter, and the top 15 states were selected. Additionally, Punjab, Telangana and Andhra Pradesh were replaced with the following 3 States/UTs, to make the sample representative by including one Union Territory and other criteria as given below:

- **Jammu and Kashmir:** To ensure participation of a Union Territory in the sample.
- **Tripura:** To increase the representation of North-East states in the sample.
- **Jharkhand:** To increase the representation of states with low progress against the targets set by the government.

Stage 2: In each State, the districts have been divided into four quartiles based on the number of

HWCs covered	1,18,905	
% HWCs covered	77.8712%	
Zone	Number of States from each zone	States covered
North	3	Uttar Pradesh, Rajasthan, and Jammu Kashmir
South	3	Karnataka, Tamil Nadu, Kerala
East	3	West Bengal, Jharkhand, and Bihar
West	2	Maharashtra and Gujarat
Central	2	Madhya Pradesh, Chhattisgarh
Northeast	2	Assam and Tripura
Total States covered	15	

HWCs per one lakh population in each district. Up to four districts may be chosen from each State for the study. The number of districts shall be selected considering the size factor (in terms of the population of the State). Also, the selected districts should not congregate in one area of the State and be representative of various regions of the State, considering the level of backwardness. However, the districts will be finalized by the Consultant after approval of the Authority before conducting the field survey.

Stage 3: The proportion of the HWCs in the chosen district will not be more than 5 % of the total eligible HWCs (HWCs which are in operation for at least one year) in the district. However, for the finalization, the number of eligible HWCs in the selected district (if the number of HWCs are relatively high) will be decided in consultation with the Authority. The selection of HWC and non-HWC will be chosen in such a manner that the ratio of HWCs to Non-HWCs is 4:1. Facilities have been provisionally selected with the aim of proportional representation of 60% SHC, 20% PHCs and 20% UPHCs in the overall sample and will be finalized with the approval of the Authority.

4.2.2. Sample Size for Households (HHs):

The sampling design for Household(HH) surveys must be representative at the National and State level and should be a representative sample of the population. At least 15 Households per HWC will be selected for the study. A minimum of 545 facilities and 8,175 HHs are proposed to be conducted with relevant stakeholders for the evaluation study. An indicative sampling framework and sample sizes are given below. Additionally, the final number of Households to be surveyed will be decided by Consultant with the approval of the Authority.

Table 2: Indicative sample size for the study

Total Number of States	Districts	HWCs covered	Non-HWCs to be Covered	Total Facilities covered	Number of Households to be covered
15	60	436	109	545	8,175

Note: It is essential to note that these numbers are indicative, and that the Consultant may suggest the methodology best suited to meet the objectives of the evaluation, if any. The final methodology will be based on the approval of the Authority.

4.2.3. Sample size for Qualitative survey

KIIs will have to be conducted with the key stakeholders involved in designing and implementing the scheme such state nodal, district nodal, Medical Officers, service providers (such as ASHA, ANM etc.). The FGDs will have to be conducted with community health workers and members of community-based institutions such as Jan Arogya Samiti etc. In addition, FGD participants can be selected from the catchment area of the selected HWCs.

A minimum of 325 KIIs, 150 FGDs (5 in each State), are proposed to be conducted with the relevant stakeholders to evaluate the Scheme. There should be an appropriate representation of women and underprivileged/vulnerable groups in the primary data collection. The indicative

sampling frame for the KIIs is given below. However, it is essential to note that these numbers are indicative, and that the Consultant may suggest their methodology best suited to meet the objectives of the evaluation, if any. The final methodology will be based on the approval of the Authority.

Table 3: Indicative sample size for KIIs

S.No.	Category	No. of KIIs
1	SHC/PHC/UPHC level	240
2	District Level	60
3	State level	15
4	Center Level	5

Schedule 3: Guidance Note on Conflict of Interest

(See Clause 2.3.3)

1. This Note further explains and illustrates the provisions of Clause 2.3 of the RFP and shall be read together therewith in dealing with specific cases.
2. Consultants should be deemed to be in a conflict of interest situation if it can be reasonably concluded that their position in a business or their personal interest could improperly influence their judgment in the exercise of their duties. The process for selection of consultants should avoid both actual and perceived conflict of interest.
3. Conflict of interest may arise between the Authority and a consultant or between consultants and present or future contractors. Some of the situations that would involve conflict of interest are identified below:
 - (a) Authority and consultants:
 - (i) Potential consultant should not be privy to information from the Authority which is not available to others;
 - (ii) potential consultant should not have defined the project when earlier working for the Authority;
 - (iii) potential consultant should not have recently worked for the Authority overseeing the project.
 - (b) Consultants and contractors:
 - (i) No consultant should have an ownership interest or a continuing business interest or an on-going relationship with a potential contractor save and except relationships restricted to project-specific and short-term assignments; or
 - (ii) no consultant should be involved in owning or operating entities resulting from the project; or
 - (iii) no consultant should bid for works arising from the project.

The participation of companies that may be involved as investors or consumers and officials of the Authority who have current or recent connections to the companies involved, therefore, needs to be avoided.
4. The normal way to identify conflicts of interest is through self-declaration by consultants. Where a conflict exists, which has not been declared, competing companies are likely to bring this to the notice of the Authority. All conflicts must be declared as and when the consultants become aware of them.
5. Another approach towards avoiding a conflict of interest is through the use of “Chinese walls” to avoid the flow of commercially sensitive information from one part of the consultant’s company to another. This could help overcome the problem of availability of limited numbers of experts for the project. However, in reality effective operation of “Chinese walls” may be a difficult proposition. As a general rule, larger companies will be more capable of adopting Chinese walls approach than smaller companies. Although, “Chinese walls” have been relatively common for many years, they are an increasingly discredited means of avoiding conflicts of interest and should be considered with caution. As a rule, “Chinese walls” should be considered as unacceptable and may be accepted only in

exceptional cases upon full disclosure by a consultant coupled with provision of safeguards to the satisfaction of the Authority.

6. Another way to avoid conflicts of interest is through the appropriate grouping of tasks. For example, conflicts may arise if consultants drawing up the terms of reference or the proposed documentation are also eligible for the consequent assignment or project.
7. Another form of conflict of interest called “scope–creep” arises when consultants advocate either an unnecessary broadening of the terms of reference or make recommendations which are not in the best interests of the Authority but which will generate further work for the consultants. Some forms of contractual arrangements are more likely to lead to scope-creep. For example, lump-sum contracts provide fewer incentives for this, while time and material contracts provide built in incentives for consultants to extend the length of their assignment.
8. Every project contains potential conflicts of interest. Consultants should not only avoid any conflict of interest but should also report any present/ potential conflict of interest to the Authority at the earliest. Officials of the Authority involved in development of a project shall be responsible for identifying and resolving any conflicts of interest. It should be ensured that safeguards are in place to preserve fair and open competition and measures should be taken to eliminate any conflict of interest arising at any stage in the process.
